CVC Capital Partners

Extensive three-dimensional computer modelling helped us to create a classic, timeless business environment in close partnership with CVC. Quality is evident in the beautiful detailing and materials – a fusion of wood, stone and glass. To finish off the scheme, we specified high quality 'Casegoods' style furniture, with matching bespoke meeting room suites.

OFFICE AREA DETAIL

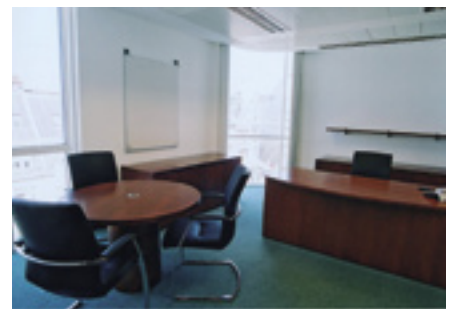

Beneath the calm finishes is a technically sophisticated installation; CVC have to deal with highly confidential matters so a high degree of acoustic integrity had to be maintained within and between individual offices and meeting rooms. This, together with the need for a full 'catering kitchen' facility, demanded an exacting design and specification for the mechanical systems.
