Global Security and IT Services

This Global Security and IT Services company has more than 300 government and industry partnerships in 30 countries. Their goals are to establish and maintain enduring partnerships with advanced technology companies around the world, and be seen as their international partner of choice. The company seeks to establish a long-term presence, earn the trust of customers, develop industrial alliances for growth, and match corporate breadth with customer priorities.

Building Exterior

Open Plan Offices

Our client said:

“Our new working environment has been incredibly well received throughout the whole organisation. May we congratulate you on a project very well done and a special thanks to your project manager. Nothing was too much trouble; he was excellent.”

Group Facilities Manager

Café Area

A calm, functional design scheme was required to reflect the client's business ethos. Low key 'non-branded' areas were also required due to the high security nature of their operation. A 50/50 split of cellular and open working areas combine with 'viewing areas' for prospective clients and a large number of meetings rooms. This project also included a complex comms room and IT infrastructure.

Open Plan Offices

Meeting Room

Our client said:

"Your ability to respond and take action was fantastic. We're delighted with your scheme and the efforts of everyone in your team to deliver our new offices – we will most definitely be using you again in the future."
